Gdynia Maritime University

Gdynia Maritime University (Polish name: Akademia Morska w Gdyni) is the university with a long and rich history, proudly continuing nearly 100-year-tradition of maritime education in Poland.

GMU is an innovative university, providing its students with knowledge and skills on the highest level, in compliance with the international standards. All the faculties conduct I- and II-cycle studies; and the Faculty of Electrical Engineering and the Faculty of Entrepreneurship and Quality Science have also in their offer doctoral studies. Moreover, all the faculties are authorized to grant a doctor degree. All maritime specializations have been awarded the certificates of

compliance with the requirements of the STCW Convention established by International Maritime Organization.

The faculties of the university continuously extend their educational offer and the scientific and didactic infrastructure is completely modern, having several unique laboratories, modern simulators and the planetary with the cutting-edge projection system. Furthermore, the university prides itself in having two very well equipped school ships: the beautiful frigate "Dar Młodzieży", famous all over the world for its sailing victories in various races and the scientific research and

training vessel, adapted for the polar zones, "Horyzont II".

Graduates of Gdynia Maritime University – officers of the merchant fleet and specialists in off-shore bases of the maritime economy – are well prepared to work in Polish and international companies operating on the global market. Studies in our university are the times of extensive work, of acquiring vast knowledge and valuable job skills as well as stimulating personal development, which all constitute the solid basis for a splendid career path and a job, which guarantees not only financial success, but also satisfaction and prestige.
